

To Whom It May Concern

RE: David Coulson Design Team: New Deck for 2451 Seine Place, Duncan, BC

In this climate of massive buiding projects and renovation mania and all the buiding trades going non-stop, I was finally able to reach a contractor who not only returned my call but showed up to inspect the property at the agreed time. David Coulson listened to my wants and needs , then itemized them and set forth a proposal for the work.

When we reached an agreement on the project, his team of associates put in full days of work, were polite and respectful( tidied up at the end of the day), and often went the extra mile.

David comes up with good ideas and is then willing to modify them when appropriate.

I'm so glad he was recommended to me and I'm very pleased with the completed project.
