To Whom It May Concern,

David Coulson and his company designed and managed two renovations at our home, namely the kitchen/dining room area and the bathrooms.

David was recommended to us by relatives who were pleased with the work he completed on their home. We did our research, visited showrooms, talked with other design/contractors and received several estimates. Simply put, David's approach was head and shoulders above the pack – his knowledge and experience came through with an appealing innovative conceptual plan for our kitchen-dining area.

The end result and the project execution were excellent! We are delighted and our friends have been very complimentary about the transformation. With the quality job completed in our kitchen/dining room area, we had Coulson Designs come back to renovate our upstairs bathrooms. We were delivered another quality job.

Most definitely, we would recommend David Coulson Design Ltd. to others.
